Robotics + Mechatronics engineer, and Farmer
(B.Eng., M.Eng.)

Email: thomastouma13@gmail.com

Hey! I'm Thomas. I work at NASA JPL & Caltech on the most advanced robots in the world. I love to tackle unsolved problems & employ an end to end systems approach to *solving* them. I love creating things with my hands and I have had a deep passion for space exploration since my parents bought me my first telescope and electronics kit at age 8.

I've been very lucky to have worked at the following places:

Caltech

When I'm not at work, I'm on my farm with my squad **(the scary/adorable pups in this link!)**, riding dirt bikes, tinkering with cars, helping grandma & grandpa, & maintaining hundreds of acres of farm land with my family.
