INTEGRATION

Expand your drone system with apps

The Auterion SDK enables workflow integrations across your fleet. Our integration with the ESRI site scan app is providing the world's best, fully integrated enterprise workflow for mapping.

AUTERION PRODUCTS

Drones are hard but workflows can be easy

Our integrated software solutions enable end-to-end workflows from the field to the back office. From powering and controlling the drone, to analysing data in the cloud, and integrating to your existing systems, Auterion powers and automates your operation.

**OPEN SOURCE WINS**

When it comes to drone systems Open beats closed

Our open ecosystem brings together the best from the drone industry to provide customers with greater flexibility and extensibility.

CUSTOMER TESTIMONIALS

We are working with the industry leaders

C2 Group partner with Auterion

We are proud to partner with Auterion to bring some of the best technology developed in the US to our clients in the utilities and critical infrastructure industries. The open source ecosystem is helping to drive a better footprint within the marketplace and a better level of compatibility for US made products.

Auterion's open standards leadership and cooperative legacy with the developer community is foundational to a scalable and sustainable solution critical for commercial drones.

Alan Caslavka
President of Avionic Systems,
GE Aviation

The relationship with Auterion is key in being able to offer high quality, secure, drone software to our US customers that are looking to take advantage of our drone-based imagery collection platform.

Richard Cooke
Director, Global Remote
Sensing and Imagery, ESRI

Working with Auterion is great, because we got the best software team in the industry over night. Skynode allowed us to build a fully integrated system and we could focus on building the best product.

Tabb Fircha
President, Freefly Systems

Partnering with Auterion enabled us to bring realtime 5G connections and AI into our product, which is a key part of enabling full advanced solutions and AI partners like Hellsicht.

Florian Seibel
Co-Founder and CEO,
Quantum Systems
